Table 8: Paired routing differences (RouterBSI minus baseline, in percentage points) on 748 SkillSight test tasks. Brackets give pointwise 95% stratified cluster-bootstrap intervals. The first panel uses run 1; the second averages metric scores within each task over three fixed saved RouterBSI systems. Estimated differences are positive against every baseline. Intervals are not multiplicity-adjusted and exclude training variability. These saved outputs remain analysis-only and nonreportable.
