Table 1: Downstream performance. Metrics are grouped beneath each dataset. Bold/underline mark best/second distinct value within each model, retriever, dataset, and metric (ties retained). Success Rate is source Accuracy, a fraction. The average is computed over all instances. Average is supplied pooled Correct/n_tasks, using summed counts across datasets. CSV methods do not match input_runs.json; provenance is unresolved.

Method	bigcodebench	champ	logicbench	medcalcbench	theoremqa	toolqa	Average
	Success Rate	Success Rate	Success Rate	Success Rate	Success Rate	Success Rate	Success Rate
