Table 1: Skill routing performance using Qwen3.5 4B. BM25, Vector, and SkillSight are shown first as native retrieval baselines. Each remaining row is the equal-weight mean across those three retrievers. Columns report nDCG@1 (N@1) and nDCG@10 (N@10) for each benchmark; Average uses each retriever's task-weighted scores over 748 tasks. Bold and underlined values mark the best and second-best distinct scores in each column.
